EDUCATION

Bhagwan Parshuram Institute of Technology, New Delhi

B.Tech (Information Technology), CGPA - 9.57/10

2022 – 2026

New Delhi

DAV Public School, Pitampura

CBSE Class XII - 91.40% | CBSE Class X - 93.60%

2019 – 2021

New Delhi

EXPERIENCE

Compro Technologies

Jul 2026 – Present

Software Development Engineer

- Develop and maintain production backend features, owning assigned work from requirement analysis through testing and deployment.
- Debug and troubleshoot issues with cross-functional teams to improve functionality and deliver scalable solutions.
- Participate in code reviews and follow engineering practices to improve code quality, maintainability, and performance.

Compro Technologies

Jan 2026 – Jun 2026

SDE Intern

- Contributed to backend development and feature implementation on production systems; investigated bugs and performed testing/debugging to ensure reliability.

PROJECTS

Status Tracker | *Node.js, Firebase, Cloud Firestore, Google Chat Webhooks*

[Live Demo](#) | [GitHub](#)

- Built a real-time workplace availability system tracking employees' WFH/WFO status.
- Integrated Google Chat Webhooks to capture status updates and auto-sync them via a scalable event-driven workflow.
- Stored profiles and status history in Cloud Firestore and built dashboards visualizing availability and WFH/WFO statistics.

Quiz Master | *Flask, Vue.js, Redis, Celery, Bootstrap, PostgreSQL*

[Live Demo](#) | [GitHub](#)

- Developed a full-stack quiz platform with role-based **Admin and Student dashboards** for managing, scheduling, and taking quizzes.
- Implemented **asynchronous tasks** with Redis and Celery for real-time score computation and performance analytics.
- Designed **relational PostgreSQL models** and added **Redis caching** to optimize performance (demo login – Admin: admin/vm123, User: Vansh21/vansh).

Vehicle Parking App | *Flask, Vue.js, Redis, Celery, PostgreSQL, Bootstrap*

[Live Demo](#) | [GitHub](#)

- Built a full-stack multi-user parking platform with Admin & User roles and **automatic first-available spot allocation**; added **Redis caching** to boost performance.
- Developed **Celery background jobs** (daily email reminders, monthly reports, CSV export) over a normalized **relational schema**, with responsive analytics dashboards.

SKILLS

Languages: Python, C, C++, JavaScript, SQL

Backend & Async: Flask, Node.js, Express.js, REST APIs, Redis, Celery

Frontend: HTML, CSS, Bootstrap, Vue.js, Nuxt.js

Databases: PostgreSQL, SQLite, DynamoDB

Cloud & Tools: AWS (S3, SNS, SQS, IAM), Git, GitHub, Postman

Soft Skills: Team Leadership, Communication, Time Management, Problem Solving

ACHIEVEMENTS

- Consistently top performer in IT department, securing 1st rank in 2nd and 3rd year and 2nd in 1st year.
- Achieved top 5% rank out of 1 million candidates in JEE Mains 2022.
- Collaborated in teams to analyze business case problems (ZS Campus Beats, AceCloud Hackathon), contributing requirement insights and solution design.

COURSEWORK & CERTIFICATIONS

Coursework: Data Structures & Algorithms, DBMS, Software Engineering, Object-Oriented Programming (OOP)

Certification: Master Python (Udemy) – Python fundamentals and hands-on projects
